Education

Schulich School of Engineering, University of Calgary Sept 2021 – May 2026

B.Sc. in Software Engineering, Mechatronics Minor – With Distinction (Cumulative GPA: 3.643/4.000)

- Honors: Dean's List (2024, 2022)
- Scholarships: Aktirak Award in Electrical or Software Engineering (2024), Jason Lang Scholarship (2022-2024), Tony Neidermayer Memorial Bursary (2022), Alexander Rutherford Scholarship (2021)

Skills

Languages: C++, Python, C, TypeScript, JavaScript, Java, C#, HTML/CSS
Frameworks & Tools: React, Next.js, Tailwind CSS, MFC, WinAppDriver, Git, GitHub, Azure DevOps, Cursor, Jira

Experience

Seequent | Software Developer, Intern May 2024 – August 2025

Seequent develops geoscience modelling and visualization software to help organizations understand the subsurface.

- Owned UI redesigns, new-feature implementations and bug fixes in GeoStudio (C++, MFC), rebuilding legacy dialogs on the team's new dialog framework from stakeholder and customer specifications
- Wrote XML upgrade/downgrade logic for changed input fields so customers' files open correctly across versions
- Built and maintained automated UI tests (C#, WinAppDriver), integrating them into the development workflow to improve UI reliability
- Triaged nightly and per-commit CI/CD failures (Azure DevOps), tracing breaking commits for a fix or revert
- Scrum Master for 13 weeks; onboarded a new intern on code architecture and development workflows

Projects

LifeLens | Project Manager, Developer | github.com/uofc-ai2lab/LifeLens Sep 2025 – Apr 2026

Gold Medal, Capstone Design Fair (Software): AI-powered multimodal Python system that turns near real-time prehospital trauma audio and video into structured data for clinical decision support

- Built a medication-extraction pipeline (NER, custom post-processing) for drugs, dosages and routes from noisy clinical transcripts (0.84 mean medication F1 end-to-end on 10 synthetic recordings), plus audio and video anonymization modules; owned all audio-side testing
- Developed a React web app (JavaScript, Tailwind CSS) to visualize live structured data from a backend API
- Built a secure edge-to-server pipeline (NVIDIA Jetson, MQTT, Tailscale) for reliable, low-latency data transfer

PAO Fashionz | Full Stack Developer | paofashionz.ca Apr 2025 – Aug 2025

- Built a live brand site with a Shopify-powered product catalog (Next.js, TypeScript, Tailwind) in a team of 3 for a small-business owner, with branded storytelling and gallery pages
- Integrated the Shopify Storefront API for live product and event data, and Sanity CMS for no-code event updates

Extracurricular Activities

Muslim Students' Association | Khateebs (Sermon Preacher) Director Oct 2025 – Aug 2026

- Coordinated weekly Jummah (Friday) congregational prayers; recruited and trained future Khateebs with the Vice President, Islamic Affairs

Tech Start UCalgary | Vice President Internal Jul 2025 – May 2026

Student-led software entrepreneurship organization where multidisciplinary teams collaborate to design, develop, and launch software ventures, fostering technical innovation and startup creation.

- Oversaw internal operations for a 70+ member multidisciplinary software development organization, managing communications, executive meetings, governance documentation and Student Union compliance
- Led recruitment, interviewing, onboarding and executive transition planning for leadership and project teams, ensuring continuity across executive terms
