Education

Schulich School of Engineering, University of Calgary **Sept 2021 – May 2026**
B.Sc. in Software Engineering, Mechatronics Minor – With Distinction

- **Honors:** Dean's List (2026, 2024, 2022)
- **Scholarships:** Aktirak Award in Electrical or Software Engineering (2024), Jason Lang Scholarship (2022-2024), Tony Neidermayer Memorial Bursary (2022), Alexander Rutherford Scholarship (2021)
- **Awards:** Capstone Design Fair - Gold Medal (Software), Bronze Medal (Electrical) (2026)

Skills

Technical Skills: C++, Python, C, JavaScript, TypeScript, HTML, CSS, React, Java, Git, GitHub, C-Sharp
Soft Skills: Communication, Effective Learning, Goal-Oriented, Teamwork, Patience, Resilience, Problem-Solver

Experience

Seequent | Software Developer, Intern **May 2024 – August 2025**
Seequent develops geoscience modelling and visualization software to help organizations understand the subsurface and make better decisions.

- Developed and refactored core UI features in GeoStudio, a geotechnical analysis desktop application (C++, MFC), improving UI/UX, fixing shipped issues, and implementing workflow enhancements based on internal stakeholders and customer-driven specifications.
- Collaborated with engineers and product stakeholders to review feature progress, incorporate feedback, and implement UI/UX design updates aligned with user and business requirements.
- Acted as Scrum Master for 13 weeks, leading Agile ceremonies and improving sprint execution and team communication through process refinements.
- Built and maintained automated UI tests (C#, WinAppDriver), integrating them into the development workflow to improve UI reliability
- Monitored CI/CD test pipelines (nightly and per-commit), triaging failures to identify root causes and coordinating with developers to resolve issues or revert changes.
- Mentored and onboarded a new intern, accelerating ramp-up through guidance on code architecture and development workflows.

Zara | Sales and Stock Associate **Aug 2022 – July 2023**

Projects

LifeLens | Project Manager, Developer (https://github.com/uofc-ai2lab/LifeLens) **Sep 2025 – Apr 2026**
LifeLens (engineering capstone project) is an AI-powered multimodal Python system that transforms near real-time prehospital trauma audio and video into structured data for clinical prediction and decision support.

- Designed and refined a medication-extraction pipeline using NER and custom post-processing to pull drugs, dosages, and routes from noisy clinical transcripts, alongside transcript and image anonymization modules.
- Developed a React-based web application (JavaScript, Tailwind CSS) for near real-time visualization of structured prehospital data, integrating with a backend API to stream and display live session data.
- Designed and implemented a secure data pipeline for transmitting multimodal data from edge devices (NVIDIA Jetson) to a centralized server using MQTT and Tailscale for reliable, low-latency communication.

PAO Fashionz | Full Stack Website Developer (https://paofashionz.ca) **Apr 2025 – Aug 2025**

- Worked in a team of 3 to develop a custom Shopify storefront using Next.js; Integrated Shopify Storefront API for real-time product and event data visualization, experimenting with dynamic data fetching and frontend optimization, integrated Sanity CMS for automated event updates, and contributed to frontend design with TypeScript and Tailwind to deliver a branded storefront with storytelling, a gallery, and seamless shopping.

Extracurricular Activities

Muslim Students' Association | Khateebs (Sermon Preacher) Director **Oct 2025 – Present**

- Coordinating weekly Jummah (Friday) congregational prayers while recruiting and training future Khateebs in collaboration with the Vice President, Islamic Affairs.

Tech Start UCalgary | Vice President Internal **Jul 2025 – May 2026**
Student-led software entrepreneurship organization where multidisciplinary teams collaborate to design, develop, and launch software ventures, fostering technical innovation and startup creation.

- Oversaw internal operations for a 70+ member multidisciplinary software development organization, managing communications, executive meetings, governance documentation, and Student Union compliance.

- Led recruitment, interviewing, onboarding, and executive transition planning for leadership and project teams, ensuring continuity across the organization's executive structure.

NIDOA | Professional Dinner Committee - Food & Logistics Team Lead **Feb 2024 – Aug 2024**

NIDOA (Nigerians in Diaspora Organization, Americas) unites Nigerians in the Americas to advance Nigeria's development through advocacy, networking, and collaboration.

- Researched and secured vendors (food, DJ, venue, etc.) for the event.
- Collaborated with committee members to manage event logistics, including guest lists and venue operations.
- Proactively resolved vendor and venue issues leading up to and on the day of the event, ensuring smooth operations.
- Co-led the initiative to develop the event theme, empowering team members to organize guest speakers and supporting activities.

Electrical and Software Engineering Students' Society | Academic Events Commissioner **Sep 2023 – Apr 2024**

- Coordinated with VP Academic to help plan and host various academic-oriented events.

Edu-Dialect | Program Volunteer, Ambassador Manager, Vice President Student Affairs **Jan 2023 – Apr 2024**

Volunteer-driven non-profit offering global educational opportunities through innovative English language programs and community initiatives.

- Vice President Student Affairs (Aug 2023 – Apr 2024): Recruited students, and volunteers for the program, managed and mitigated all issues that arose from all students during program administration.
- Ambassador Manager (Aug 2023 – Dec 2023): Researched on countries for program expansion. Contacted and communicated with other organizations and charities.
- Program Volunteer (Jan 2023 – Mar 2023): Met with partner once a week and had in depth discussions and checked written assignments on various topics to help increase their English speaking/writing proficiency.

Islamic Centre of Calgary (ICSC) Quran School | Teaching Assistant **Feb 2018 – Mar 2020**

- Instructed 15+ young children in learning the Arabic alphabet to support their journey in reading and memorization of the Qur'an with confidence and comprehension.

Nigerian Canadian Muslim Congregation Calgary (NCMCC) | Treasurer Assistant **Nov 2016 – May 2021**

- Collected monthly dues using POS system from male side during monthly meetings, assisted in fundraising events.
